

バイタル測定：体温と血圧

Taking Vital Signs — Scenario Dialogue

Can-do: Explain and take a resident's temperature and blood pressure, and reassure them about the results.

1 · Dialogue & Why — 会話

Hana
(caregiver)

たなか たいおん はか
田中さん、体温を測りますね。

Tanaka-san, I'll take your temperature.

Why: 測る = 'to measure' — the one verb for taking temperature, blood pressure, pulse, weight. ～ますね softly tells the resident what you're about to do before you do it — always narrate your actions in care so nothing surprises them.

Tanaka-san
(resident)

ねが
はい、お願いします。

Yes, please go ahead.

Why: お願いします here means 'please (do it for me)' — agreeing to and inviting the action. Short, natural resident response.

Hana
(caregiver)

した い
わきの下に入れますね。じっとしててください。

I'll put it under your arm. Please stay still.

Why: わきの下 = 'armpit / under the arm' (わき + の + 下). じっとしててください = 'please stay still' — じっと is 'motionless'. Clear, gentle instructions keep the reading accurate and the resident comfortable.

Hana
(caregiver)

ど ぶ へいねつ
36度8分です。平熱ですね。

It's 36.8 degrees. That's a normal temperature.

Why: Temperature decimals are read with 分 (ぶ): 36.8 → 36度8分. 平熱 = 'normal (healthy) temperature'. Say the number AND what it means — residents relax when you interpret the result for them.

Hana
(caregiver)

つぎ けつあつ はか すこ うで
次に血圧を測ります。少し腕をしめますよ。

Next I'll take your blood pressure. It'll squeeze your arm a little.

Why: 次に = 'next'. 血圧 = 'blood pressure'. しめる = 'to tighten/squeeze' — warning the resident that the cuff will press (少し = 'a little') prevents them from being startled. The よ gently alerts them.

Tanaka-san
(resident)

ねが
よろしくお願いします。

Please, go ahead.

仕事日本語: Shigoto Nihongo ねが = a soft 'I leave it to you / please take care of it'. Very common when handing yourself over to someone's care or service.

Hana
(caregiver)

うえ
上

130

した
下

80

です。

いい

数字

ですよ。

130 over 80. Those are good numbers.

Why: For blood pressure, 上 ('upper') = systolic and 下 ('lower') = diastolic — so 上が130、下が80 = '130 over 80'. 数字 = 'numbers/figures'. Reassuring with 'いい数字ですよ' turns a reading into comfort.

Tanaka-san
(resident)

あんしん

安心

しました。

I'm relieved.

Why: 安心する = 'to feel relieved / at ease'. 安心しました (past) = 'I felt relieved' — a natural, warm response to good news. A word you'll want residents to feel often.

Hana
(caregiver)

つか
お疲れ

さまで

した。

ゆっくり

休ん

で

ください

ね。

Thank you for your patience. Please rest and take it easy.

Why: お疲れさまでした = 'thank you for your effort' — said after any shared task (a check-up, work, an activity). 休んでください = 'please rest'. Close every care interaction warmly.

2・Key Vocabulary — 語彙

#	日本語	ROMAJI	ENGLISH	メモ / NOTES
1	たいおん 体温	taion	body temperature	
2	はか 測る	hakaru	to measure	
3	ねが お願いします		please	
4	した わきの下	wakinoshita	under the arm; armpit	
5	じっと		still; motionless	
6	へいねつ 平熱	heinetsu	normal body temperature	
7	ど 度	do	degree(s)	
8	けつあつ 血圧	ketsuatsu	blood pressure	
9	うで 腕	ude	arm	
10	しめる		to tighten; to squeeze	
11	仕事日本語 ねが ようしくお願いします	Shigoto Nihongo	please (I leave it to you)	Free video lessons on YouTube · ks-08-vitals

12	すうじ 数字	<i>suuji</i>	number; figure	
13	あんしん 安心する	<i>anshinsuru</i>	to feel relieved; to be at ease	
14	つか お疲れさま	<i>otsukaresama</i>	thanks for your effort	
15	やす 休む	<i>yasumu</i>	to rest	

3・Patterns to Reuse — 使える かたち

PATTERN	MEANING & USE
～を 測りますね	'I'll measure your ~' — announce before you act
じっと していただき い	'please stay still' — for accurate readings
○度○分 / 平熱です	reading temperature (36.8 → 36度8分) + interpreting it
上が ○、下が ○	reading blood pressure (systolic / diastolic)
お疲れさまでした	'thanks for your effort' — close warmly

4・Practice — れんしゅう

Say / write it in Japanese, then check with the answer key.

#	SAY THIS IN JAPANESE	YOUR ANSWER
1	Announce: 'I'll take your temperature.'	
2	Read this temperature: 36.8°C	
3	Warn gently: 'It'll squeeze your arm a little.'	
4	Read this blood pressure: 130 over 80	
5	Close warmly after the check: 'Thanks for your effort.'	

5・Answer Key — こたえ

1. たいおん 体温を はか 測りますね。

2. 36度8分

3. すこ 少し うで 腕を しめますよ。

4. うえ 上が 130、した 下が 80

5. つか お疲れさまでした。
